A slide with a purple gradient background featuring a faint ECG line watermark. The section title 'Course Description' is centered in a large, dark font. The main content is a detailed paragraph describing the WI Web Portal. In the bottom left corner is a small logo for 'digital innovation incorporated' with a stylized 'd' icon. In the bottom right corner is a copyright notice: 'Copyright © 2011 Digital Innovation, Inc. All Rights Reserved.'

Course Description

The WI Web Portal is a tool that enables users to access the central site trauma registry to enter data and access reports. This course will provide instruction for users on how to enter data into the registry as well as how to select and prepare reports for their hospitals.

Course Objectives

- Access the Web Portal
- Enter data into the Trauma Registry via the Web Portal
- Use Tri-Code™ for injury coding
- Access and run reports from the Web Portal

Copyright © 2011 Digital Innovation, Inc. All Rights Reserved.

Session Format

- Three-Part Lecture with Software Demonstration
 - Web Portal Access & Log In
 - Trauma Registry
 - Report Runner
- Handouts
- Practice Exercises

Trauma Registry

Copyright © 2011 Digital Innovation, Inc. All Rights Reserved.

Trauma Registry Overview

- The Trauma Registry Module manages data entry.
- The Trauma Registry is used for the following tasks:
 - Adding trauma records
 - Searching for trauma records
 - Editing trauma records
 - Viewing trauma records
 - Deleting trauma records

Copyright © 2011 Digital Innovation, Inc. All Rights Reserved.

Trauma Registry Access

- Select <Modules>
- Select <Trauma Registry>

Copyright © 2011 Digital Innovation, Inc. All Rights Reserved.

Record Manager: Purpose

- Displays a selected subset of the trauma records included in the Trauma Registry.
- The subset of records is filtered based on:
 - the hospital Facility ID entered on the login screen
 - the search criteria entered by the user

Copyright © 2011 Digital Innovation, Inc. All Rights Reserved.

Record Manager: Content

- Rows of patient information
- Columns
- Function buttons

Copyright © 2011 Digital Innovation, Inc. All Rights Reserved.

Record Manager: Columns

- Trauma #
- Facility Name
- Last Name
- First Name
- Arrival Date
- Discharge Date
- Record Status

Copyright © 2011 Digital Innovation, Inc. All Rights Reserved.

Record Manager: Sorting Columns

- Can sort only **one** column at a time.
- Using the mouse, left-click on the column to be sorted.

Copyright © 2011 Digital Innovation, Inc. All Rights Reserved.

Record Manager: Relocating Columns

- Can move column location.
- Drag & Drop the Column to the desired location.
- Location change is only preserved for the current session.

Coding Diagnoses

- Tri-Code
- Manual

Copyright © 2011 Digital Innovation, Inc. All Rights Reserved.

Tri-Code: Overview

- Based on Abbreviate Injury Scale (AIS)
- Dependent on injury description

Copyright © 2011 Digital Innovation, Inc. All Rights Reserved.

Tri-Code: Why?

- Ranked as an expert ICD-9 and AIS coder.
- Allows for fast, accurate coding of injuries.
- Converts simple textual injury descriptions to ICD-9, AIS, and ISS scores.
- Provides uniform coding for trending and outcome studies.
- Allows for accurate comparisons of data across different datasets.
- Provides a statistical way to accurately measure the severity of a patient's injuries.

Copyright © 2011 Digital Innovation, Inc. All Rights Reserved.

Tri-Code: Rules

- Enter one injury description per line
- Enter a complete injury description
 - Anatomic structure
 - Type of injury
 - Extent of injury
 - Location (side of injury Left, Right)
- Common abbreviations may be used
- Enter **all** of a patient's injuries
- Enter only definitive diagnoses

Copyright © 2011 Digital Innovation, Inc. All Rights Reserved.

Tri-Code: Action Taken

- Processes and codes each injury description
- Upgrades severities due to the presence of other injuries, when appropriate
- Identifies the ICD-9-CM code, the AIS PREDOT code, and the severity score for each injury as well as those associated with upgrades

Copyright © 2011 Digital Innovation, Inc. All Rights Reserved.

Tri-Code: Injury Narrative

- Enter injury descriptions into the Injury Narrative Field
- Specific guidelines can be found in the Tri-Code User Manual (Abstracting Injury Descriptions)

Copyright © 2011 Digital Innovation, Inc. All Rights Reserved.

Tri-Code: Execution

- Select the Tri-Code button
- The Anatomical Diagnoses information will auto-populate

Copyright © 2011 Digital Innovation, Inc. All Rights Reserved.

Tri-Code: Overwriting Previous Codes

- Change injury narrative to reflect necessary changes
- Select the Tri-Code Button
- When the <Confirm Tri-Code> message appears, select the OK Button

Copyright © 2011 Digital Innovation, Inc. All Rights Reserved.

Manual Coding

- In the Anatomical Diagnosis section, select the Add button
- Enter the desired ICD-9 Code
- Enter the desired Predot
- Select the AIS Severity
- Select the ISS Body Region
- Select the OK Button

Copyright © 2011 Digital Innovation, Inc. All Rights Reserved.

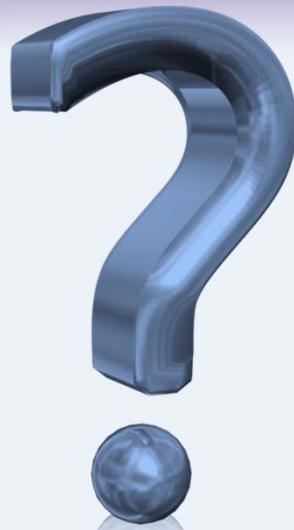

Trauma Record: Save Options

- Located at the bottom of the trauma record window
- Select Save to save the current trauma record
- Select Save/Exit to save the current trauma record and exit
- Select Cancel to exit the record without saving changes
 - The Confirm Cancel screen will open. Select OK to confirm the cancel without saving.
 - Select Cancel to remain in the current trauma record

Validation Checks

- Purpose
- Types of checks:
 - Blank / Required
 - Sequence
 - Range
 - Duplicate

Copyright © 2011 Digital Innovation, Inc. All Rights Reserved.

Checks: Executing

- Can be executed at any time from within the trauma record
- Best practice is to execute after data abstraction has been completed
- Select the Check button on the bottom left of the patient record

Copyright © 2011 Digital Innovation, Inc. All Rights Reserved.

Checks: Correcting Data

- Click on the field containing the error triggering data
- Enter correct data

Copyright © 2011 Digital Innovation, Inc. All Rights Reserved.

Checks: Validating / Overriding

- If the data is correct, click on the Validate button
- Use Caution! Inappropriate validation can lead to unreliable data

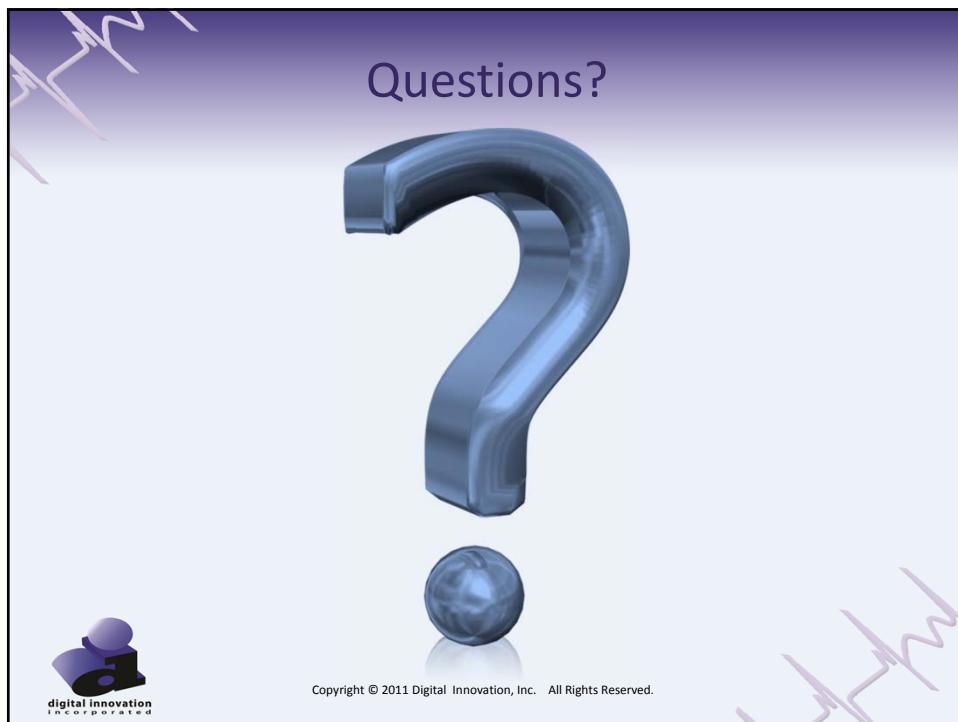

Copyright © 2011 Digital Innovation, Inc. All Rights Reserved.

Closed Record Status

- Indicates that checks have been performed and validated on the current record
- Once all check issues are resolved, the Checks Resolved screen will open. Select OK
- Select Save or Save/Exit to save the validated record
- The record status will now update from Active to Closed

Report Runner

Copyright © 2011 Digital Innovation, Inc. All Rights Reserved.

Report Runner: Purpose

Provides the user with pre-built objects to review / analyze data contained within the trauma registry.

Copyright © 2011 Digital Innovation, Inc. All Rights Reserved.

Report Runner: Access

From the Web Portal Welcome Screen

- Click on the <Modules> link
- Click on the <Report Runner> link

Copyright © 2011 Digital Innovation, Inc. All Rights Reserved.

Report Runner: Tabs

- Report
- History

Copyright © 2011 Digital Innovation, Inc. All Rights Reserved.

Report Tab: Selection

- Report
 - Answers the question WHAT?
 - What do I want to see
- Query
 - Answers the question WHO?
 - Creates a subset of the patient population
- Gather
 - Answers the question HOW?
 - How do I want to group values for comparison

Mix and Match

Copyright © 2011 Digital Innovation, Inc. All Rights Reserved.

Mix and Match: Philosophy

Each report can be run by itself or with any query and/or gather, increasing the flexibility and strength of the report writer.

Copyright © 2011 Digital Innovation, Inc. All Rights Reserved.

Example: Patient Record List

When run by itself, the Patient Record List:

1. Provides a list of **all patients in the registry** (for the records specified).

Copyright © 2011 Digital Innovation, Inc. All Rights Reserved.

Example: Patient Record List

When run with a query for non-survivors, it:

1. Provides a listing of trauma registry numbers for only those **patients who did not survive**.

Copyright © 2011 Digital Innovation, Inc. All Rights Reserved.

Example: Patient Record List

When run with a gather by age it:

1. Provides a listing of trauma registry numbers for **all patients in the registry**
2. Groups them by age ranges.

Copyright © 2011 Digital Innovation, Inc. All Rights Reserved.

Example: Patient Record List

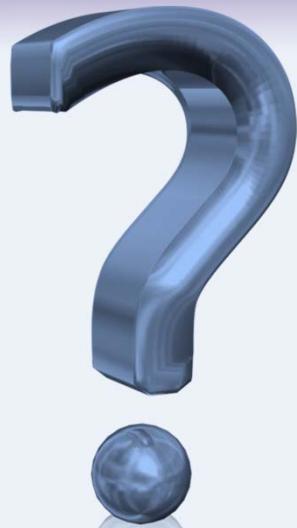

When run with a query for survivors and a gather by age:

1. Provides a listing of trauma registry numbers for only those **patients** in the registry **who survived**
2. Groups them by age ranges.
